

Please amend the present application as follows:

*In the Claims*

Please substitute the following clean copy text for the pending claims of the same number, and cancel claims 2-3 without prejudice, waiver, or disclaimer.

---

a1 1. (Once amended) A camera, comprising:

a memory for storing at least one camera setting in association with a particular user;

a physical attribute sensor for identifying the user; and

a processor for controlling the camera according to said stored at least one camera setting in response to a signal from the sensor that indicates that the user has been identified.

---

---

a2 4. (Once amended) The camera recited in claim 1 wherein said physical attribute sensor comprises at least one of a fingerprint sensor and a retinal scanner.

---

---

a3 6. (Once amended) A camera, comprising:

means for identifying a physical attribute of a user of the camera; and

means for automatically controlling the camera according to stored photographic control settings associated with an identified user.

---

---

a4 8. (Once amended) The camera recited in claim 6, wherein said means for identifying a physical attribute of a user comprises at least one of a fingerprint sensor and a retinal scanner.

---

9. (Once amended) A computer readable medium for use with a camera, comprising:

logic for identifying a physical attribute of a user of the camera; and

logic for controlling the camera according to stored photographic control settings associated with an identified user.

---

α5 11. (Once amended) The computer readable medium recited in claim 9, wherein the logic for identifying a physical attribute of a user of the camera includes logic for receiving input from at least one of a fingerprint sensor and a retinal scanner.

12. (Once amended) A method of operation for a camera, comprising:  
receiving a user identification obtained by sensing a physical attribute of the user; and

controlling the camera according stored photographic control settings associated with that user.

---

α6 14. (Once amended) The method recited in claim 14, wherein said receiving step includes receiving a signal from at least one of a fingerprint sensor and a retinal scanner.

Please add the following *new* claims:

α7 15. (Newly added) A camera, comprising:  
a memory for storing at least one image data processing setting in association with a particular user;

a user identification sensor for identifying the user; and

a processor for controlling the camera according to said at least one image data processing setting in response to a signal from the sensor that indicates that the user has been identified.

16. (Newly added) The camera recited in claim 15, wherein said user identification sensor comprises a physical attribute sensor.

17. (Newly added) The camera recited in claim 16, wherein said user identification sensor comprises a fingerprint sensor.

18. (Newly added) The camera recited in claim 16, wherein said user identification sensor comprises a retina scanner.

19. (Newly added) The camera recited in claim 15, wherein the at least one data processing setting comprises at least one of a date imprinting setting and a compressed format setting.
